

PHYSICAL SCIENCE II - STUDENT PERMISSION SLIP

for

THE BROMFIELD POWER TOUR

The Bromfield Power Tour, currently planned for May 1st, is a field trip to three local facilities to culminate our study of mechanical/electrical energy, work, machines, power, energy transformation and distribution. The facilities are: Power Technologies Inc. of Fitchburg (*a power generation equipment design group*), Pinetree Power of Leominster (*a sustainable energy production facility*) and the Light Department of Littleton (*an electrical power transformation and distribution facility*). As planned, students will get to see first hand and up close, local infrastructure that enables the delivery of convenient electrical power to their homes, schools and businesses. The tour itinerary covers the time period from the end of homeroom until approximately 2:15PM that day. As such, students will miss all of their classes and should make arrangements, in advance, with their teachers to make up any missed work.

Transportation for this activity will be by bus (*with chaperones*) and the cost of this service is **\$15.00** per student. Please make checks payable to the Town of Harvard – Class of 2011. **This slip should be returned to Mr. Menin by Monday, April 7th, 2006 with payment.** This tour does not include lunch, but students may bring a lunch or purchase it at the Sears Town Mall Food Court that we will be stopping at during the overall tour.

Note: For your child's safety we ask that all students wear long sleeve shirts, long pants and flat bottom (*or non-high-heel*) leather shoes (*no sandals*). We also ask that students refrain from the wearing of any loose-fitting clothing or external jewelry that day. Other safety equipment, such as hearing protection, hard hats and safety glasses, will be provided. Students with long hair may be asked to tuck their hair into their hard hats. Please remind students that all facility safety regulations must be adhered to. These regulations will be presented prior to the trip (*and reviewed the day of the trip*) during an in-class safety presentation.

Should you have any questions on this subject please call Gary Menin at Bromfield at 978-456-4152 x 279 or email: gmenin@psharvard.org.
