Time, Hours

What is the velocity of object B?  
  
-6.67  
km/hr east

What is the speed of object B?  
  
6.67  
km/hr

At what time will object B reach the origin?  
  
12  
hours

If object B continues with this motion, what will be its position at time  $t = 48$  hours?  
  
-220  
km east

At what time will object B reach a position of 406 kilometers to the west of the origin?  
  
79.6
