

Jingle Bells

*Gravity, gravity keeps us on the ground.
An apple fell on Newton.
He said, "What goes up comes down".
Gravity, gravity, mass times nine point eight.
Remember travel very fast if earth you must escape.*

Noel

*Newton, Newton, Oh What did you say?
When you sat under the apple tree that day.
Could it be? Could it be? It was only a dream?
Or was it an example of Inertia you'd seen?
Newton, Newton, Newton, Newton
Why didn't you stay inside that day?*

We Three Kings

*We three units of measurement are.
Meters, seconds, kilograms too.
Thank you Newton, thank you Joule for the names you lent.
Measurement Data for the lab, when we are finished we will all be
glad.*

Frosty

*Physics, our favorite course, is the study of energy.
With plenty of units and measurement, the sense I will never see.
The tests are unreal and the labs are long, with plenty of write-ups to
do.
When I signed up for this course I expected something new.*
